

**Claims:** I claim:

1. An index card holding device which is attached to the surface of an object comprising:
  - (a) an inner flat plate piece slightly larger in area than card or cards to be held, and
  - (b) two middle spacer pieces, and
  - (c) two outer end cap pieces, and
  - (d) pressure sensitive adhesive, providing means for connecting said flat plate piece to said object, and said middle spacer pieces to said flat plate piece, and said outer end cap pieces to said middle spacer pieces,
  - (e) said outer end cap pieces and said inner flat plate piece provide means for securing said card or cards to said object so as to enable said card or cards to be removed and replaced means conveniently,
  - (f) wherein said flat plate piece, said middle spacer pieces, and said outer end cap pieces are composed of plastic or metal.
2. A card holding device of Claim 1 wherein said flat plate piece, said two middle spacer pieces, and said two outer end cap pieces are comprised of a single integral piece of plastic with similar gap between said flat plate piece and said outer end cap pieces providing means for securing said card or cards to said object so as to enable said card or cards to be removed or replaced means conveniently.
